## GREEN WINDOWS

Your new windows will have an impact far beyond the rooms where they are installed. Energy-efficient windows guarantee lower energy bills, a lower environmental impact and, most importantly, a greener future.

Homeowners lose a good part of their heating and cooling dollars due to window inefficiencies. Mercury Excelum Harmony Windows efficiently insulate your home, greatly reducing energy consumption, saving you hundreds of dollars a year in energy costs.

And, as important as saving money is, more efficient windows also allow you to produce less harmful gases such as CO<sub>2</sub>. This means your savings will be seen well beyond your energy cost. In fact, if every home in America had the most efficient windows, we could save the environment over 56 million tons of CO<sub>2</sub> a year.

Efficient Envirosealed Windows™ create a more comfortable environment inside your home and out. For more information visit [www.mercuryexcelum.com](http://www.mercuryexcelum.com).
